

BRANDWALL WRAP

Flexible Exhibition Display

The BrandWall Wrap product is designed specifically to work with standard exhibition divider wall systems. At a standard height of 2.3 metres, the Wrap system can be designed and printed at any length (up to 12 metres) to suit any standard exhibition booth.

The product is printed on Paragon's ultra smooth and durable retail PVC banner (with no texture or dimples) and comes complete with Velcro applied to the back and is ready to apply to exhibition carpet walls within minutes.

BRANDWALL PANEL

Exhibition Display Panel

BrandWall Panels are semi-rigid panels designed to work with standard exhibition divider wall systems, the panels come complete with receptive Velcro for quick adhering to the surface of exhibition walls within minutes.

The panels come in configurations of 1m wide by 2.3m tall which is the standard exhibition wall height and images can be tiled over multiple panels. Part panels can also be produced for non-even expo booth configurations such as 3.6 metres.

Another benefit of BrandWall Panels is that you get a rigid display look but the panels can be rolled for ease of transport and storage. For extra protection panels are laminated for situations of frequent use.

SIZE	DISPLAY SIZE	PRICE*
3 Metre	3000mm x 2300mm	\$745.00
