

ECO POSTER

Eco Friendly Printing

Paragon Eco Posters are an environmentally friendly, short term, large format printing solution. Using Kodak's Quantum ink provides not only outstanding colour gamut and density but as a dye (water) based ink system it is produced from a renewable source and is far less harmful on the environment.

Eco Posters are also printed on a microporous resin-coated photo paper that features unrivalled image quality and is certified by PEFC (an independent assurance mechanism to purchasers of wood and paper products) who promotes the sustainable management of forests.

Eco Posters are completely recyclable through standard and household recycling systems and are also a cost effective printing solution.

SYNTHETIC POSTER

Durable Digital Printing

The Paragon Display Synthetic Poster is a high quality, durable printing solution.

Printed using eco-solvent inks on our Epson GS6000 printer, Synthetic Poster is completely resistant to moisture and can be used for short term outdoor display or conditions where the poster is going to be reused or handled frequently.

Another benefit of Synthetic Poster is the near photographic quality of the printing output making it a great option for high-end retail environments.

Synthetic Poster is also available in custom sizes.

Size	Display Size	1 only*	2-5*	6-10*	11-20*
A2	420mm x 594mm	\$35.00	\$31.50	\$29.75	\$26.25

* All prices are excluding GST and packaging & delivery. All specifications and pricing is subject to change without notice.

SMARTBOARD

Premium Lightweight Display

Paragon's SmartBoard is ideal for retail & exhibition environments and short to medium term display solutions. SmartBoard is a lightweight though extremely rigid 5mm panel and it's extremely white surface compliments our UV direct printing process. Also, due to its very good weathering properties SmartBoard can be used for outdoor applications for up to two years.

Adding to its excellent display properties, SmartBoard's core of expanded polystyrene allows the product to be simply disposed of in plastic recycling bins after use.

COREBOARD

Lightweight Outdoor Display

CoreBoard is both an ergonomically friendly and recyclable product as well as being a cost effective short term outdoor display solution.

Paragon print directly to CoreBoard and the product is made up of a tough and durable polypropylene co-polymer with UV stabilisers, and can last in general exterior weather conditions. At the end of the products use SmartBoard can be simply disposed of in plastic recycling bins.

Size	Display Size	1 only*	2-5*	6-10*	11-20*

ECOBOARD

Recycled Panel Display

EcoBoard's unique high-crush strength paper core is manufactured from post-consumer recycled paper and sugar cane waste, with VOC-Free organic adhesives, resulting in kraft-based boards that weigh as little as one-seventh the weight of MDF & particleboard.

Images are printed directly to the board using our UV printing system, eliminating the need for any PVC based adhesives or media. At the end of use EcoBoard can simply be disposed of in paper-recycling bins.
